

PREFACE

The manual is intended for students of computer faculties learning professional English. The main purpose of the manual is to polish and perfect the English skills of students that will enable them to deal effectively with reading materials on speciality. In other words, it aims to bring the students from a general knowledge of the English language to the competence necessary for tackling more difficult work, such as mastering professional English.

The book is designed to guide the students in the development of a conscious, reflective attitude toward learning English.

The manual consists of 10 units, vocabulary and glossary. Every unit provides students with short readings coordinated by theme and vocabulary. There are exercises that deal with technical terms and grammar structures. Every unit presents computer terms and concepts that students need to know in order to write and speak on topics related to their profession.

The manual is also very helpful for students who wish to read and understand computer related authentic material.
