In • The writer says “I had lost my freedom again”. What tells you the word AGAIN. Why did the writer want to escape?

Writing Assignment

- How do you understand such as word as “freedom” or “to be free”. Explain your answer in a paragraph using some facts from your own life or your friend's life.

do you think are superior: men or women? Myth has it that men are, but anthropologist Ashley Nontagu disagrees.

Physically and psychically women are by far the superior of men. The old chesnut about women being more emotional than men has been forever destroyed by the facts of two great wars. Women under blockade, heavy bombardment, concentration camp confident, and similar rigors withstand them vastly more successfully than men. The psychiatric casualties of civilian populations under such conditions are mostly masculine, and there are far more men in our mental hospitals than there are women. The steady hand at the helm is the hand that has had the practice at rocking the cradle. Because of their greater size and weight, men are physically more powerful than women-which is not the same thing as saying that they are stronger than man of the same size and weight as a woman of comparable background and occupational status would probably not be any more powerful than a woman. As far as constitutional strength is concerned, women are stronger than men. Mny diseases from which men suffer can be shown to be largely influenced by their relation to the male Y-chromosome. More males die than females. Deaths from almost all causes are more frequent in males of all ages. Though women are more frequently ill than men, they recover from illnesses more easily and more frequently than men.
